

SIDDHĀLĒPA

Physicians diagnose diseases. Medicines cure them. Every physician according to his conscience prescribes medicines on which he relies to cure the diseases. Yet some diseases may not be cured. That may be due either to inefficacious medicines or incurability of the disease. On such occasions the physicians should not be blamed. Every physician tries to cure diseases by using effective medicines. No matter of the origin or the make of the medicine. Today the world tries to get at medicines proved to be efficacious. It has been proved in experiments that "SIDDHALEPA" is a cure for the diseases mentioned herein. The patients do not go to the medicine, but to the physicians.

Therefore every physician is kindly requested to prescribe without hesitation this medicine for curing diseases,
